

Appropriate rider conduct, recommended by FIM AFRICA, should include the following:

- A** Save petrol and reduce pollution by avoiding unnecessary idling of engines.
- B** Limit noise pollution by using your horn only in an emergency.
- C** Avoid noise annoyance. Use a standard or another quiet exhaust system and keep audio systems at a low level.
- D** Protect wildlife and its natural habitat by riding intelligently.
- E** Respect nature by not traveling on paths which risk being damaged beyond a point of natural recovery.
- F** Encourage a rational use of fuel and space economy by using motorcycles instead of driving automobiles.
- G** Ensure that your used oil, tyres, batteries and other litter are properly recycled or collected.
- H** Ride at posted speed limits. Riding faster creates more noise.

The Fédération Internationale de Motocyclisme (FIM) is the world governing body for motorcycle sport and the global advocate for motorcycling.

As Continental Union of the FIM, FIM AFRICA strives to provide strategic and environmental leadership necessary to ensure that all categories of motorcycling in Africa have a reduced impact on the environment, and to create a greater awareness of environmental sustainability amongst all motorcycle stakeholders.

Motorcycling as a leisure activity has grown with increasing levels of popularity in recent years. Traffic congestion in cities means that motorcycles are often the quickest way to travel. Public transport in large cities can sometimes be overcrowded or slow. These factors, and also the congestion charge to drive a car have also persuaded more people to commute by motorcycle.

We must voluntarily moderate and add a greater degree of responsibility to our natural desire for individual mobility. We should try to achieve results on the basis of freedom of thought and movement, and exploit every opportunity to combine the pleasure of motorcycling more effectively with ecological and economic needs. Every motorcyclist is encouraged to enjoy, to the fullest extent, their travels without leaving a damaging environmental footprint of their journey.

FIM AFRICA's Environmental Code and other relevant information are available on our website:
