AFRICAN MOTORCYCLE SPORT MEDICAL
CAPACITY DEVELOPMENT INITIATIVE

BUILDING MEDICAL CAPACITY | STRENGTHENING ATHLETE WELFARE | ADVANCING SAFER MOTORCYCLE SPORT

November 17, 2026

The Presidents / Executive Directors
FIM Africa Member National Federations

RE: INVITATION TO PARTICIPATE IN THE LAUNCH OF THE AFRICAN MOTORCYCLE SPORT MEDICAL CAPACITY DEVELOPMENT INITIATIVE - MEDICS IN MOTORCYCLE SPORT TRAINING, 11TH DECEMBER 2026

Dear President,

Motorcycle Sports Federation of Kenya (MSFK), through its Medical Commission, is pleased to invite your Federation to participate in a regional Medics in Motorcycle Sport Training Programme on Friday, 11th December 2026, at Matteo's MX Track, Naivasha, Nakuru County, Kenya, from 0900 to 1500hrs.

Convened ahead of Round 2 of the 2026 FIM Africa Central Africa Motocross Challenge (CAC), this programme marks an important step towards establishing an African Motorcycle Sport Medical Capacity Development Initiative: a coordinated effort to grow, empower and connect medical professionals supporting motorcycle sport across the continent.

Our ambition extends beyond a single training session. We seek to build a sustainable regional network of motorcycle sport medical professionals, supported by practical training, mentorship, knowledge exchange and progressively improved approaches to medical preparedness and injury surveillance.

The initiative builds on the successful FIM Medical Mentorship Training undertaken in 2025 and reflects the shared interest of FIM Africa and its Member National Federations in strengthening grassroots motorcycle sport development, athlete welfare and the professional capacity required to support the sport's growth.

TRAINING PROGRAMME

1. Motorcycle sport medical preparedness and first responder training: Introduction to the motorcycle sport environment, trackside medical operations, trauma assessment, initial stabilisation, emergency response coordination and evacuation considerations.
2. Anti-doping sensitisation: Education on clean sport, prohibited substances, athlete and medical professional responsibilities, and the importance of protecting athlete health and integrity.
3. Digital injury surveillance - Fit2Play System: Introduction to the Fit2Play System and its potential application in injury documentation, reporting and the development of a more structured approach to medical information and injury surveillance in motorcycle sport.

PROPOSED AREAS OF COLLABORATION

- Nominate two to three medical or healthcare professionals involved, or interested, in motorcycle sport medicine.
- Encourage participation by doctors, clinicians, nurses, paramedics, emergency medical technicians and other relevant first responders.
- Identify medical personnel who can become national champions for improved medical preparedness and athlete welfare.

- Support continued knowledge exchange, peer mentorship and professional networking among medical personnel across African Federations.
- Explore opportunities to apply the training and approaches introduced within national competitions and motorcycle sport development programmes.

VALUE PROPOSITION TO PARTICIPATING FEDERATIONS

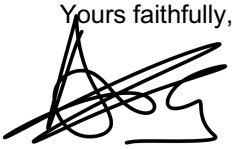

- Build national medical capacity through shared regional training and expertise.
- Improve preparedness for national and regional motorcycle sport competitions.
- Develop a network of trained medical professionals who can support local events and contribute to the growth of the sport.
- Access opportunities for continued mentorship and professional knowledge exchange.
- Explore digital approaches to injury documentation and surveillance that can inform medical planning and athlete welfare.
- Contribute to the development of a more coordinated and sustainable African motorcycle sport medical framework.
- Our longer-term vision is to establish a regional community of practice that supports ongoing professional development, facilitates the sharing of experience and progressively strengthens medical standards across African motorcycle sport.
- We therefore encourage your Federation to nominate two to three suitable participants and support their attendance in this inaugural phase of the initiative.

TRAINING AND REGISTRATION DETAILS

DATE	Friday, 11th December 2026
TIME	0900–1500hrs
VENUE	Matteo's MX Track, Naivasha, Nakuru County, Kenya
REGISTRATION	https://fit2play.bladedoc.net/medics/

We look forward to welcoming representatives from across Africa as we take this important step towards building a stronger, safer and more professionally supported motorcycle sport community.

Yours faithfully,

FOR: MSFK MEDICAL COMMISSION
Motorcycle Sports Federation of Kenya (MSFK)
